

*[11.03 13:28] Jeff Konnen (Geoportail Luxembourg)*

Hallo, ich bin Jeff Konnen vom Geoportail Luxembourg. Ich bin momentan noch in einem anderen Meeting, höre aber so gut es geht zu. Ab 14h00 bin ich dann ganz dabei

*[11.03 13:36] Jeff Konnen (Geoportail Luxembourg)*

Renaud Michaëlis und Joe Mayer kommen auch vom Geoportail Luxembourg (als Info)

*[11.03 13:46] Daniel Gnerre*

Thanks Rémi and Pauline for working on website !

*[11.03 13:48] Daniel Gnerre*

Thanks a lot to Guillaume for this Getting started ! It has been tested by Stéphane from SIITN, and it seems to work well.

*[11.03 13:48] Rémi Bovard*

Link: [https://github.com/geomapfish/getting\\_started](https://github.com/geomapfish/getting_started)

*[11.03 13:49] Pauline Fanguin*

Thanks Daniel !

*[11.03 13:49] Marc Riedo*

Thanks for this nice job !

*[11.03 13:49] Malta E Sousa Stéphane*

Yes! This getting started makes it really easy to start a new geoportal from scratch and it works pretty well! Thanks a lot Guillaume!

*[11.03 13:50] Arnaud Poncet-Montanges (PULLY)*

Thanks a lot, this will be a very good entry point to a more Open project!

*[11.03 14:03] Arnaud Poncet-Montanges (PULLY)*

What are the 1:1 rough migrations evaluated? AngularJS -> Angular?

*[11.03 14:03] Arnaud Poncet-Montanges (PULLY)*

What about map.geo.admin.ch?

*[11.03 14:03] Daniel Gnerre*

We don't have the same needs as map.geo.admin.ch

*[11.03 14:04] Malta E Sousa Stéphane*

The 1:1 offer was made with AngularJS-> Angular which is the most straightforward scenario

*[11.03 14:04] Daniel Gnerre*

and we want to keep the server side and the admin part

*[11.03 14:04] Malta E Sousa Stéphane*

AngularJS -> orther framework would be more expensive in the 1:1 migration

[11.03 14:05] Arnaud Poncet-Montanges (PULLY)

That's GMF 3.0

[11.03 14:05] Jeff Konnen (Geoportail Luxembourg).

map.geo.admin.ch is switching to vue.js ... is that an option for you too, in the progressive migration?

[11.03 14:05] Daniel Gnerre

not decided yet, but yes it is possible

[11.03 14:06] Olivier - Yverdon

we're using vuelayers in <https://geocity.ch/app> if you like to explore

[11.03 14:06] Arnaud Poncet-Montanges (PULLY)

Estimated cost in case of AngularJS -> Angular does not include the training costs of developers and users

[11.03 14:07] Jeff Konnen (Geoportail Luxembourg). (Guest)

Geoportail Luxembourg is heavily using ngeo and if we agree on a common target framework we can cofinance a part of the migration of ngeo

[11.03 14:08] Arnaud Poncet-Montanges (PULLY)

That's a good news! :)

[11.03 14:08] Daniel Gnerre

What propose the PSC is a mix between 1:1 and progressive

[11.03 14:08] Daniel Gnerre

That's what Guillaume is explaining

[11.03 14:13] Rémi Bovard

Ping @Jeff (for the framework)

[11.03 15:05] Daniel Gnerre

Thanks to you Guillaume for all coordination work !

[11.03 15:07] Malta E Sousa Stéphane

Thanks Daniel for the integrations tests on 2.6, we haven't started yet at Neuchâtel

[11.03 15:11] Rémi Bovard

The link if you want to test : <https://geomapfish-demo-2-6.camptocamp.com/>

[11.03 15:13] Rémi Bovard

[11.03 15:16] Arnaud Poncet-Montanges (PULLY)

Does it mean that activating mapillary will remove street view? Clicking on the map does not show where mapillary data are, neither on street view, is there a technical limitation about it?

*[11.03 15:19] Marc Riedo*

Thanks everybody for the great work and positive feedback ! Great community !

*[11.03 15:19] Poma Giosia*

thanks a lot

*[11.03 15:19] "Raphael Wunderlich "*

Thank's

*[11.03 15:19] Thomas L.*

Thanks for the job ! Have a good day !!

*[11.03 15:19] Gérard Sollberger*

bye !

*[11.03 15:19] Marc Riedo*

Bye

*[11.03 15:19] Olivier - Yverdon*

merci

*[11.03 15:19] PA Crausaz*

ciao tout le monde et merci

*[11.03 15:20] Santoro Tobia*

merci bye

*[11.03 15:20] Fumagalli Theo*

Thanks
