Bonjour à tous!

*[Dienstag 13:45] Olivier Monod - Yverdon (Invité) (Gast)*

Will also the features frozen in backend or only front ?

- ⇒ The Features will be frozen only in the front. New features can still be added to the Backend. However, the PSC would like to focus on the changes that will prepare the removal of AngularJS, and so while it is not excluded to add a feature or two in the backend, we would like to limit them.

*[Dienstag 13:46] Olivier Monod - Yverdon (Invité) (Gast)*

ok, thanks

*[Dienstag 13:56] Christophe Imbach (Guest) (Gast)*

Is there a plan B in case the web component POC is unsuccessful?

- ⇒ This was discussed during the meetings between the PSC and C2C. We all agree that there is no technical reason why the POC should not be a success. The goal of the POC is more to specify costs and deadlines, in order to be able to have a better vision of future migrations. However, if the POC should be unsuccessful, we also studied other possibilities such as replacing AngularJS with another framework such as Angular, Vue or React.

*[Dienstag 13:58] Christophe Imbach (Guest) (Gast)*

ok I see, thx

*[Dienstag 14:02] PAC Crausaz (Invité) (Gast)*

So we need 50 kfrs in 2021 and 50 kfrs in 2022

- ⇒ The costing was split into two parts to clearly differentiate the cost corresponding to the POC and those corresponding to version 2.7. However, we will do a single fundraising for all of the costings.

*[Dienstag 14:03] PAC Crausaz (Invité) (Gast)*

ok

*[Dienstag 14:05] Olivier Monod - Yverdon (Invité) (Gast)*

Thanks!

*[Dienstag 14:05] Roger Maurer (Invité) (Gast)*

Thank you !

*[Dienstag 14:05] Christophe Imbach (Guest) (Gast)*

bye

*[Dienstag 14:05] PAC Crausaz (Invité) (Gast)*

Ciao merci
